Office Action Summary

CLAIMS

112 Rejection

1. Claims 4-16 are objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim can be depend from a multiple dependent claim. See MPEP § 608.01(n). Accordingly, the claims 4-16 not been further treated on the merits.
2. Claims 1-16 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1, line 2 from the bottom, what are "they" referring to?

Art Rejection

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) do not apply to the examination of this application as the application being examined was not (1) filed on or after November 29, 2000, or (2) voluntarily

published under 35 U.S.C. 122(b). Therefore, this application is examined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

4. Claims 1-3 are rejected under 35 U.S.C. 102(e) as being anticipated by Jacobsen et al. (US 6073034).

Regarding claim 1, Jacobsen shows:

A display means (202 in fig.8, 301 in fig. 10a) having first and second edges (top and bottom edges of the display);

Means (218) for performing key function;

A housing (210) having first and second ends (connections for 215 and 204);

A cover part (208);

The first edge of the display means (top of 202) is nearer the second end (connection for 204) of the housing than the second edge of the display (bottom of 202);

The key means (218) are nearer the second end (connection for 204) of the housing than the first end (connection for 215) of the housing.

Regarding claims 2-3, Jacobsen shows:

The distance from the second edged (bottom of 202) of the display to the second end (connection for 204) of the housing is substantially greater than distance from the second edge (bottom of 202) of the display to the first end (connection for 215) of the housing;

The display (202) is closer to the first end (connection for 215) of the housing than the key means (218).

5. Claims 4-16 have not been treated, see the improper multi-dependent claim rejection above.
